## Biodiversity in Belgium

<http://youtu.be/XMhyCmuzpfg>

Famous Belgian biologist Dirk Draulans made a very good documentary about biodiversity in Belgium. He talks about the fragile ecologic equilibrium in Belgium.

This equilibrium is often disturbed by exotic animals or plants. The competition between exotic and endemic animals and plants is fierce!

Draulans talks about Canadian geese, parrots, foxes and bullfrogs disturbing the ecologic system in Belgium.

Our pupils watched this documentary and discussed the topics. It was part of our natural sciences classes in the second year.
