Description of the activity:

Excursion and visit to a biomass power plant.

Every year our teachers of geography, economics en technical classes organise an excursion in the northwest of our province.

They study the landscapes, soils and activity of 3 typical agricultural zones:

Polders (clay), Zandstreek (sand) and Duinen. (dune sand)

Comenius Project: Are you a CO₂nsuser?
Activity report version 2.0
Second project year 2011-2012

In the afternoon we visited the biomass power plant of Electrawinds, a Belgian firm that specialises in renewable energy. The pupils watched a movie on renewable energy in our country and visited the different part of the biomass plant. This power plant uses dried garbage to produce electricity and tries to wash the smoke so there is a reduction of polluting gases.
