Description of the activity: Ceramic arts classes						

On 31 st March our second grade students participated in ceramic arts classes at The Ceramic and Handicraft Workshop "The Elements of the Earth" in Lublin. They did it as part of their regular Art lessons.

The students learnt about the general process of making ceramic dishes items. Then they could try to check their knowledge and skills in practise. Their task was to create an Easter clay bunny, cockerel or a lamb. While doing the figures, the students demonstrated huge imagination and creativity. However, the best thing for the students appeared to be making earthenware on a potter's wheel. All the pottery of our amateur potter will be baked in a kiln and delivered to scholl. The next step will be colouring and decorating of the earthenware at school.
